

Face Shield

VI-05, CE-166 Approved – Danish design and Danish produced

VI-05 Face shield

The face shield is designed and produced in Denmark. The face shield covers the entire face and protects effectively nose, mouth and eyes against virus from sneezes and droplets from other persons. The face shield

is designed as disposable and reuse is at the discretion of the user.

VI-05 is CE approved according to EN-166

The face shield is designed to protect for instance patients

at hospitals, health care workers, dentists, airport staffs

and others with close personal contact.

The face shield comes with protection foil on both sides

which is to be removed before use. The foil ensures that the

face shield is completely clear and without scratches.
